Faculty Position in Microbial Pathogenesis  
Washington University School of Medicine in St. Louis

The Center for Women’s Infectious Disease Research (cWIDR, http://cwidr.wustl.edu/) invites applicants for a TENURE-TRACK faculty position at the Assistant Professor level in the Department of Molecular Microbiology at Washington University School of Medicine in St. Louis. We are seeking applicants in any area of microbiology who are motivated to create a high impact research program in microbial pathogenesis focused on infectious diseases relevant to women, and to engage in interdisciplinary, collaborative research. Previous experience in women’s health research is not a prerequisite and we especially encourage applicants with bold new perspectives. We welcome applications from members of groups that are typically under-represented in science. The successful applicant will occupy space in cWIDR’s state-of-the-art laboratories located in the recently constructed BJC Institute of Health Building. Washington University offers an intellectually exciting, collegial, supportive environment with robust graduate and post-doctoral programs and extensive opportunities for interdepartmental collaboration. Additional information can be found at www.microbiology.wustl.edu. Applicants should be committed to teaching graduate and professional students and establishing a vigorous, cutting-edge, externally funded research program. Requirements include a Ph.D. in an appropriate discipline, postdoctoral training, and evidence of scholarly publications. To apply, please send a single PDF document containing Curriculum Vitae, selected reprints, and a 2-3 page description of current and planned research interests to microsearch2015@wusm.wustl.edu. Three letters of recommendation should be sent separately. All materials should be received by November 1, 2015; applications thereafter will be considered on a rolling basis.

WUMS is an equal opportunity/affirmative action employer. Women and minorities are especially encouraged to apply.
